Product Parts

- 1 - Hub and Bottom Legs
- 2 - Arms

Display Set-Up

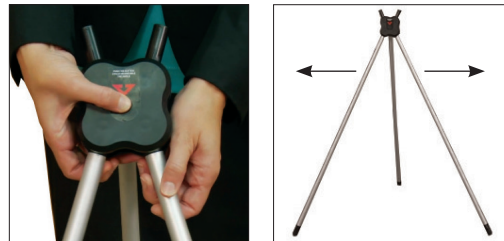

Step 1

Remove parts from bag and place the unit on the ground/work surface. Extend the back leg and secure into place by turning the knob on the hub.

Step 2

Press the center button on the hub (1) to move the bottom legs (1). Spread the front bottom legs to approximately the width of your banner and stand up right on all 3 legs.

Step 3

Slip each arm (2) into the holes on the top of the hub (1), being sure that the hooks face the same direction as those on the bottom legs (1).

Step 4

Attach the top of the banner by hooking the grommets onto the hooks on the Arms (2). Gently pull the bottom grommets down to place into the bottom hooks. The arms and legs will need to bend, which will pull the banner taut. Stand the unit upright, and adjust the back leg out to support the stand.

Gently bend arms (2) when attaching banner.

Caution: Do not force a smaller than recommended banner on the display as it may cause damage to the unit. See Graphic template on-line for recommended size.

Storage

Place all product parts into Carry Case and store in a cool dry location.

Care

To clean, wipe with damp cloth.
